Professional Summary

Accomplished Engineering Professional with a proven track record in design, project leadership, and driving financial/cost reduction strategies. Renowned for enhancing productivity and implementing cost containment systems. Expertise in process optimisation and leading continuous improvement initiatives using Lean Manufacturing and Six Sigma methodologies.

Experienced Mechanical Engineer with over 10 years of expertise in the aerospace sector. Well-regarded for problem-solving acumen and consistently improving customer satisfaction through innovative solutions and effective collaboration

Work History

2023-07 -
Current

Engineering Lead

INFOSYS

- Reviewed FAI reports and approved SOR-MEP in the workflow.
- Assessed and approved Production Part Approval Process (PPAP) documentation in accordance with industry standards and project requirements.
- Provided expert technical support and guidance to suppliers, facilitating seamless collaboration and resolution of technical challenges.
- Compiled detailed pre-contract technical packs, ensuring all specifications and requirements were clearly defined and communicated.
- Assessed supplier-provided evidence to verify compliance with digital minimum standards, ensuring consistency with plans agreed with RR.
- Organized and led technical deep-dive

2018-01 -
2023-06

sessions with suppliers to address complex issues and drive performance improvements.

Senior Manufacturing Engineer

TATA Advanced Systems Ltd, Bangalore

- Lead Manufacturing & NPD Engineer engaged in manufacturing of Aero Engine Composite Components for Roll Royce, & Pratt-Whitney Engines.
- Lead Configuration Manager driving Legacy program for Roll Royce (FACC).
- Implementation of PFMEA and Control Plans with Cross Functional teams for preventing defects through CAPA.
- Review BOM, Routing, Technical Plans, Process Documents & SOPs to ensure strong Process and Product Planning into Manufacturing Systems.
- Engaged in analyzing critical Engineering Changes and impacts by considering all factors including Quality and Cost.
- Identification of Root Cause Analysis of technical issues through Why-Why analysis, Test of Hypothesis and implement counter measures to improve processes for achieving Zero Defect.
- Conduct process, process flow diagram, NC Setup sheets
Key Characteristics, BOM & raw material planning.
- Planning, executing and monitoring part from new product development till production.
- Proving First Article Inspection (FAI) and Delta FAI both on composite and machining.
- Interpreting Drawings and customers Specifications (Pratt & Whitney and Rolls Royce)
Manufacturing Operation requirements and Process Qualification Requirements.
- Coordinating with customer on FAI (First Article Inspection) & all Documentation submission.
- Carrying out process audits and verifying Poka - yoke at regular intervals.

- Reducing cost of poor Quality of Products By corrective and preventive Actions.
- Leading, training and monitoring performance of team members; analyzing KPI's, developing concepts leveraging on emerging technologies.
- Delivering training sessions in Lean, Kaizen, and problem-solving methods like FMEA, Control Plans, root cause analysis, Poke Yoke.

2014-07 -
2017-12

Manufacturing Engineer

Safran HAL Aircraft Engines Private Limited, Bangalore

- Established First Part Qualification for SILVERCREST & LEAP 1A & 1B Engine tube assemblies.
- Technical feasibility reports preparation.
- Manufacturing technical sheet preparation.
- Process tools identification & developing.
- Process cycle time estimation, PFMEA & Risk assessment documents preparation.
- Supporting technical issues related to design and manufacturing activities.
- Preparing First Part Qualification documents as per AS9100.
- Maintaining complete configuration of parts and implementing changes through 'Engineering Change Cycle'.

2012-01 -
2014-07

Methods Engineer

TE Connectivity, Bangalore

- Established First Part Qualification for Audi project as per customer requirement for Roof Rail Sensors, Speed sensors & Hall sensors.
- Designing process for manufacturing Sensors by preparing process documents and process control sheets.
- Preparation of PFMEA, Process flow, Standard operating procedures for new products / process.
- Optimizing new & existing processes through Six sigma, lean manufacturing techniques (like line

balancing / standard work instructions / Kanban / Visual factory / Cell concept / Quick change over / Work place organization / Error proofing)

- Process qualifications and operators process qualification through training.
- Coordinating with planning, stores, incoming, quality, Purchase and product engineering departments for smooth execution of production.
- Ensuring spares availability and preventive maintenance of machines and fixtures.
- Responsible for calibration of machines and instruments.
- Support development and improvement of key production processes such as molding, potting, fixture fabrication and part marking.

Education

Bachelor of Engineering: Mechanical Engineering

New Horizon College of Engineering - Bangalore,
India
